DYNAMIC ENGINEERING

David Leduc
6 Years Experience

EDUCATION:

Bachelor of Building Engineering - Concordia University
Applied Science - John Abbott College

EXPERIENCE:

Mr. Leduc started with Dynamic in 2024. David excels in managing complex restoration and construction projects through precise phasing, scheduling, and budget management. With a background in building engineering from Concordia University, he brings expertise in contract management and project engineering. His dedication to client satisfaction and detail-oriented approach, combined with his passion for innovative problem-solving, has led to the successful completion of significant projects that enhance functionality and aesthetics.
